## Our Strategy:-

- Selection of areas
- Identification of the target group
- Follow the rules and regulations of VO and Govt.
- Project implementation as per instructions of the Donor partners and Govt. rules.
- Manage Committee formation as per bye-law time to time.
- Timely Audit, place of audit report in the annual general meeting and convene others meetings.
- Update social media sites and maintenance of accessible website.
- Cooperation with the people, Panchayats and local administration.
- Good governance.
- Transparency.
- Honesty
- Networking with the like-minded NGOs and Forums.

## APPEAL AND MESSAGE FROM THE SECRETARY

From: S. Karan, M.A., DHSM  
Secretary, SIDS

Greetings from SIDS. We are happy to present the Annual Report of our activities for the year 2021-22. We are trying always to implement various types of programs for the development of the poor and downtrodden people with particular emphasis on differentially vulnerable groups like women, children and youths in rural area.

Since its establishment, the organization kept itself involved in all round development for the people living at disaster prone Sindarbans island areas. During the pandemic year, the organization has reached out to more and more people and made ardent effort to bring about positive changes in the lives. The important projects that implemented during the year 2021-22 are Installation of tube well for safe drinking water, Biotechnology oriented programs such as excavation of pond, supply of saplings and fingerlings and duck rearing, Construction of toilets at poor households, Awareness programs for COVID-19 with distribution of sanitary kits and ration distribution among the Coronavirus affected people, Ration distribution among YAAS affected families, Awareness programs on Road safety, Child trafficking and Consumer protection act, Vocational training for rural poor youths on Carpentry, etc. The Pre-Primary school which started in the month of June' 2018 is running smoothly and the roll strength is increasing day by day.

SIDS is ever grateful to all the organizations, agencies, corporate entities for their whole hearted support to improve the lives and living conditions of the people of this area. We thank them for this generosity and hope they will continue to extend their support in the coming years. I would like to express many thanks to all volunteers, well-wishers, esteemed patrons, advisors, members and Govt. authorities for their dedicated and selfless contribution in the successful implementation of the programs. I also thank all the staff of SIDS whose hard work, efforts and dedication have made the organization beautiful. We also convey thanks and good wishes to the rural people of our working areas who volunteered to implement the programs successfully. Long live SIDS.

Date- 25/07/2022

With thanks,  
 Subimal Karan  
 SECRETARY

## MESSAGE FROM THE PRESIDENT

From: Prankrishnan Maiti, M.A.  
President, SIDS

Dear Friends,

At First, I convey my gratitude to all the members of SIDS, members of the Governing body and staff for their dedicated and selfless contribution and untiring efforts in the implementation of the programs and activities successfully in the year 2021-22. I also convey my heartiest greetings to all wishers, advisors, agencies, Panchayats, Govt. and Non-govt. authorities, authorities of the youth clubs and women organizations, social activists and rural people of our working areas for their kind cooperation and support in implementation of the programs smoothly.

We have stepped 17 years from the birth of the society. I think that SIDS is doing something significant for the well-being of the people in need. It emphasizes on bringing both qualitative quantitative changes in the lives. I so hope, the SIDS will intensify its activities in every remote area of Sundarbans in future. Being a registered N.G.O under Society Registration Act 1961, SIDS has been implementing numerous community development projects in the areas of health, education, livelihood promotion, environment protection issues and development of persons with disabilities with the aegis support from Government and Non-Government agencies for sustainable development of the poor and marginalized communities. The organization has been working with a vision to build up a society full of love, peace, equality and to uphold the human dignity in the process of empowerment and service facilitation.

It is great pleasure to say that all the persons of these areas have good faith on us and for this we collect heavy amount from them as donation each year for the welfare of the common people. In this year we organized a few webinars on Road safety, Consumer protection act, Child trafficking, etc. Moreover, we have implemented a few schemes like Toilet construction, installation of tube well and Biotechnology oriented programs. SIDS organized relief distribution camps among the Coronavirus and YAAS affected people and also organized a vocational training on Carpentry. SIDS run a Pre-primary school which started since 2018.

At last, my heartiest request to all departments, agencies and donor persons for making kind cooperation and assistance in future in fulfilling our mission for the service of the needy and disadvantaged people of Sundarbans.

Thanks to all  
Prankrishnan Maiti  
President

Date: 25/07/2022

### Installation of tube well for safe drinking water

Scarcity of safe drinking water in the villages is acute. The existing tube wells are very distance. There are about 23 households in the surrounding area of the proposed point. The families of the area go to fetch drinking water about  $\frac{3}{4}$  k. m. and  $\frac{1}{2}$  k.m. in distance. The people are to depend on pond or tank water for drinking and domestic use. But an essential component of primary health care is clean water. Clean water is vital to our health, communities and economy. People depend on clean water for their health.

As per need of the local people, the organization installed one tube well near the house of TapanGiri at DakshinLaksnminarayanpur village from both the own fund of the organization and contribution of the villagers.

#### Expected result:

- Cent percent people surrounding the tube well will get safe drinking water.
- Overall health status of the target community and students will be developed and water borne diseases will be controlled.
- Habits to use of safer water among people will be increased and malnutrition among children will be controlled.

### Seminar on Consumer protection act:

Unfair practices are widely prevalent in our society in all walks of life. To control all these unfair practices, the Govt. of India has sought to combat the social evils through a series of acts such as the Food adulteration act, the weights and measures act, Prevention of black marketing act, Consumer protection act, etc. The consumer of all levels specially the poor villagers are the most sufferers and become sometimes victims.

As a responsible social development organization, SIDS feels that it is our duty to protect the consumers from the mal practices adopted by the traders. To create awareness among the consumers regarding their rights, SIDS organized one day awareness camp at Kishorinagar Flood shelter.

#### Outcome of the program:

- 70 persons directly aware regarding Consumer protection act
- Participants will inspire other people about this act.
- Consumers will be protected from adulterated goods and mal practices of the sellers.

## Vocational training on Carpentry

One of the salient features of SIDS is to create income generation opportunities for the unemployed poor youths. SIDS organized a vocational training on Carpentry with eight poor youths for three months. The main objective of this training was to create a basic knowledge among the youths and to create interest in this vocational training.

Throughout ancient history until our modern era, every civilization in the world has used wood to create useful as well as beautiful and decorative objects. Woodworking, in fact, was one of humankind's first skills. After training, the trainees will primarily be able to do any type of works of the doors, windows, flooring, roofs and almost every other wood component of a structure. A six –month course is required to make

furniture. Due to lack of funds it was not possible for us to do this training.

### Impact of the program:

8 Nos. of poor youths gained skills.

6 Nos. of youths started the work as professional for livelihood.

## Relief materials distribution among YAAS affected families

One of SIDS's main objectives is to stand by flood victims and provide relief. Recently, YAAS cyclone has swept over the Sundarbans. PatharPratima block under Sundarbans has been seriously affected by the storm. This time, as every time, SIDS stood by the flood victims and distributed relief items to the flood victims as much as they could. The organization distributed ration ( Rice, Flour, mustard oil and Musur dal) and cooked meal and drinking water to the victims of Rakshaskhali and Gangapur villages under PatharPratima block.

**Construction of toilet**

The overall purpose of good sanitation is to provide a healthy living environment for everyone, protect the natural resources such as surface water, ground water and soil and provide safety, security and dignity for people. Using toilets prevents germs from getting into the environment and protects the health of the whole community. Good sanitation would not prevent infections without practicing good hygiene. A simple habit of washing hands goes a long way towards preventing diseases.

SIDS constructed three nos. of individuals' toilets during this financial year at DakshinLaxminarayanpur village. The fund collected from the donor persons and has expended properly for that purpose.

**Awareness camp on COVID-19 and ration distribution**

The people of the project area are very poor and the poor families have no source of income without labour. So the labourers of about each family go to other states and countries for regular jobs. During lock down period they have come back at their houses. During this period there is no huge works for them. The poor families who have no other source of income are suffering from food problems and they have no capability to purchase masks, sanitizer etc. for preventive measures. SIDS engaged Health Workers for six villages to aware the people door to door and distributed sanitizers, soap and masks. The announcements by sound system and poster campaign lasted for several months. The organization also distributed rice, flour and mustard oil among the Coronavirus affected persons. Like last year during the year 2021-22 SIDS played a major role in the COVID-19 programs.

**Impact of the program:**

The incidence of Coronavirus was reduced by 80 percent in six villages.

The Coronavirus affected persons were benefitted through the distribution of relief.

## Implementing various programs on Road safety

Shibganj Integrated Development Society (SIDS) has been implementing various types of awareness programs on Road safety during last two years. In the year 2021-22, SIDS has implemented various programs on Road safety. The theme of the year's National Road Safety Week is "Road Safety-JeevanRaksha". Considering the seriousness of Road Safety Week, SIDS organized various programs such as webinar, quiz contest; distribution of Road Safety leaflets; drawing competitions and slogan writing contest so that people follow the safety rules set by Govt. for vehicle safety on the road and also to keep yourself and your loved one's safe. All these programs are organized to develop a positive attitude towards the people to walk and drive safely on the roads.

### Expected result of the programs:

- Awareness will be increased among the people regarding road safety.
- Road accidents have been reduced in the project area.
- There is a tendency among the people to comply with Road safety laws.

## Pre-Primary school for coastal poor infants

Early childhood care and education is more than preparation for Primary school. Most of the poor parents in our rural area who cannot fulfill the basic needs of their children, generally do not want to send their children to school. A survey in the school surrounding area was done by the members of SIDS and it is observed by the members that the students in the primary level

have the tendency to drop out. The organization closely follows up this process and motivates their parents to continue sending their children to school. The organization follows up and tries to help the children so that they can continue their studies.

The school is managed by 2 teachers and mother group of target children. School dress, books and educational materials are provided to the children. Experienced A.N.M. visit the centre at least twice a month for health checkup and growth monitoring of the children. Toys and pictures are used to make them interesting. The teaching methods like learning in playing, learning in doing, storytelling, use of IEC materials like posters, charts, pictorial, etc. are followed. SIDS gives special thrust upon their character building. Apart from education the children get scope to participate in various cultural activities, competition, sports and games, etc.

### Outcome of the project:

- 42 coastal poor children are continuing their education continuously.
- All the skills including education have increased among the children.
- The attitude has been created among the guardians to send their children to school.

## Webinar and meeting on Child trafficking

Child trafficking is an issue that is extremely prevalent in India and it is continuing grow rapidly. The trafficking of young girls under the age of 18 has grown over the last decades according to the National Crime Record Bureau. There have been numerous reports about the increase of trafficking of children in the Sundarbans. In some cases, children are taken from their homes to be bought and sold in the market. In other cases, children are tricked into the hands of traffickers by being presented an opportunity for a job. Mainly children are trafficked into the Sundarbans for various reasons such as labour, begging and sexual exploitation. Some of the root causes of child trafficking in Sundarbans are poverty, lack of education and the need to financially support their family, when children are offered work.

Action against child trafficking in India is being taken at many levels. Any gaps in the implementation of schemes and laws are largely filled in by NGOs that work to address different aspects of this issue. SIDS organized awareness programs to aware the common people especially women and women with children in the islands areas about child trafficking.

## Biotechnology oriented programs

Biotechnology is one of the emerging career fields in India. Majority of the farmers in the world use agricultural biotechnology to increase yields, prevent damage from insects and pests and reduce damage done on environment due to farming. Biotechnology has helped improved food quality, quantity and processing. Health, life,

quality and expectancy of life have been increased worldwide through the services provided by biotechnology. The students, youths and local people of Sundarbans areas are accustomed to the traditional methods in every sphere of life. Scopes of Biotechnology do not reach to the people anyhow.

SIDS has started in this year a few programs on Biotechnology. One pond has been excavated for agricultural purpose. Small fish have been released in the pond for fish farming and economic benefit. Saplings have been planted on the bank of the pond to protect the environment. Ducks have been farmed in the ponds to maintain the natural balance. Compost fertilizer has been used for plantation. Organic fertilizer without chemicals is used as fish food. Our organization emphasizes on biotechnology dependent farming.

### Our Finance and Accounts

We maintain Books and Accounts by proper accounting system

We have cash book, ledger, receipts, voucher, Balance sheet, Bank account, etc.

All the accounting policy and procedures are documented.

### Membership

Membership of the society is open to all individuals including NGO leaders who are interested and dedicated to carry out their programs in perfect conformity with the objectives of the society.

### Role

The central role of the Shibganj Integrated Development Society is "Service Provider". To discharge the duties and responsibilities of the central role it complies with the inherent roles like motivator, facilitator and enabler.

### NGO's Advisors

Mr. N. C. Paul, Retired Zonal Director, Nehru Yuva Kendra Sangathan.

Mr. Parimal Karan, Under Secretary, Ministry of Training and Govt. of India

Mr. Tarun Kumar Maity, Head Master, KamdevpurSnehabalaSikshaniKetan (10+2).

Mr. Subhendu Kumar Hota, Advocate, Calcutta High court

Smt. Shailaja Y. Experienced Health Care, CSR professional with 3 decades of experience in Philanthropic Organization.

### Patron and well-wishers of the organization

Prof. Vijoy Krishna Das, Retired Professor, Bangabasi College, Kolkata

Mr. Rampada Bera, Retired Lieutenant, Indian Commission

Smt. Dipali Mondal, Samity Education Officer, Kulpi Development Block

Smt. Sabitri Pramanik, Health supervisor, Madhab Nagar B.P.H.C.

Sri Phani Bhusan Giri, Retired Headmaster, Dakshin Mahendrapur S. B. High school

Sri Amal Kumar Mondal, Secretary, Naba Maitri Sangha

## Success story

Sri Satyabrata Das of village Durgagovindapur under PatharPratima block in the district of South 24 Parganas participated in the vocational training course on Carpentry organized by SIDS during three months. She comes of a very poor family and due to extreme poverty he dropped out of ninth grade. He used to work as daily labor. In the meantime, he got the news of vocational training from our organization and submitted an application for admission. After taking interview he got a chance to take admission.

He is a youth of 34 years of age. His father is above 76 years and has no ability to work hard. His mother is aged and physically weak. He is the only son of his father. He has married and has one son of 3 years of age. The youth eagerly participated in the training program for three months. During these three months all income in exchange for his labour was off and his family was in a lot of trouble.

After completing the training he mentally prepared to start the work. He purchased the instruments taking a loan from his relative and started the work at his house. Gradually his aptitude for making furniture increased and the scope of business also increased. He has chosen to make furniture as a professional work in his life. Now, he is always engaged in this work. He earnRs. 12000.00 to 15000.00 per month and his family is solvent. The social status of his family has been increased gradually. Quality of the making product is very good and it is getting better. The other youths in the village and adjacent villages were inspired by the work. The consumers are trying to have Satyabrata for their work. Moreover, Demand for furniture made by Satyabrata is increasing day by day in the locality.

**Our approach**

- Safety and Quality Management
- Best solutions and timely services
- Budgeting and costing
- Understanding and caring
- Site supervision, administration and execution
- Strengthening systems
- Empowering Communities
- Knowledge Management and Learning
- Gender equality
- Legal compliance

**Our Policy**

- Code of Conduct
- Privacy policy
- Child Protection Policy
- Donation Refund and cancellation Policy
- Procurement Policy
- Finance Policy
- Sexual-harassment Policy
- HR Policy

**Our values**

- We believe that every person is a seed that can be nurtured to help grow a better world.
- We believe that promoting life skills and education, we can empower others to lift themselves.
- We believe that every person's human rights should be respected, affirmed, and fulfilled.
- We believe that by solving problems at the community level, we can strengthen societies.
- We believe that effective teamwork and collaboration can deliver professional services. We are
- committed to participatory decision making.
- Pursuing innovative and effective solutions, creative ideas, and ongoing improvement. Innovation
- is a key driver for our growth.
- We will work with others to help the world's needy, regardless of race, gender, age, creed or
- nationality, color, political affiliation, gender or belief.
